Subject: Docket No. 2005-385- E

I have always been an advocate of renewable energy. As our nation is perched at a cusp of realization of the impact we are having on the environment and our world, it is time we change our ways and make every reasonable effort to cut back our dependence on fossil fuels and foreign oil. Net metering, enabling average consumers to sell back to the grid excess power they produce by their own means, is an obvious and clear positive step in the right direction. Please support net metering!
